Invoice Authorisation Schedule

All invoices received by the Association must be **checked** and **approved** before payment. These two stages must be done by two separate people and the approver must always be above the checker in the line management structure (apart from when the CEO is the checker).

Invoice Checking - The invoice should be checked by the person who placed the order or requested the service. For larger contracts where procurement is separate from contract management, responsibility for checking and approving invoices will be set out in the contracts register. If the responsible person (or people) is/are absent, then the checking must be done by their line manager. Where checker should be the CEO, but CEO is absent either of the Director can check.

The person checking the invoice must ensure that the goods/services/works have been provided as per the contract, to the required standard and quality and allocated to correct budget.

Invoice Approving - Once checked, the invoice must then be approved by the checkers line manager or next tier up depending on the approval levels set out below (apart from when the CEO is the checker). The approver should double check as a control measure that they are confident that the purchase is **appropriate and within budget**. Where approver should be the CEO, but CEO is absent either of the Director can approve as long as they did not also check.

In instances where the CEO is the checker: The invoice approval step will be carried out by the Director of Resources (or in their absence the Director of Operations) up to the Director approval limits below. Where the invoice amount exceeds Director approval limits, the Chair must also approve in addition to the Director of Resources (or in their absence the Director of Operations).
